

## PEVA/EVA/TPU 流延膜生产线

PEVA/EVA/TPU  
**CAST FILM**  
EXTRUSION LINE

# PEVA/EVA/TPU PEVA/EVA/TPU流延膜生产线 CAST FILM EXTRUSION LINE

## 生产线特点 Extrusion line Features

### 原料 Raw Material:

接受不同树脂材料的组合，例如 PEVA、EVA、TPU、LDPE 和 LLDPE。极具弹性、韧性。

Resin materials are accepted to be combined such as PEVA, EVA, TPU, LDPE and LLDPE. Its has good flexibility and resistance.

### 制品 Products:

具有出色的透明度和光泽度，无异味，可热封。

Excellent transparency and gloss, no smell, heat-sealable.

### 特殊性 Particularity:

用于EVA膜、PEVA膜和TPU膜加工的螺杆、流道和导辊均为特制，最优化的挤出机和T型模具保证了高性能挤出，功能均达到工业4.0的标准。

The screws, runners and guide rollers used for the processing of EVA film, PEVA film and TPU film are all specially made, and the optimized extruder and T-die ensure high-performance extrusion, and the functions all meet the standards of Industry 4.0 .

## 应用领域 Application Fields

### ▶ EVA膜 可用作太阳能电池封装，或玻璃层压的粘合膜

EVA film can be used as solar cell encapsulation, or adhesive film for glass lamination.

### ▶ PEVA薄膜 产品在浴帘，手套，伞布，桌布，雨衣等

PEVA film can be used as shower curtains, gloves, umbrella fabrics, tablecloths, raincoats, etc.

### ▶ TPU薄膜 用于牙套，车衣膜，输液袋，鞋材等

TPU film can be used as braces, car paint protection film, infusion bags, shoe materials, etc.

注：以上所列资料仅供参考，可根据客户要求量身定制。

Note: Informations listed above are for reference only, the production line can be designed by customer's requirements.
